The present invention is directed to an improvement of a game of the type discussed above in which the set of individual tokens is replaced by a single three-dimensional token. In the improved game according to the invention the single token is in the form of an object that has a plurality of surfaces that are preferably flat. The object can be for example, a cube, parallelepiped, pyramid, etc. On each of a plurality of the surfaces there is a representation of a type of conveyance. For example, on one surface there can be a representation of an auto, on another surface a boat and so forth. The representations can be painted, screen printed or otherwise printed on the surfaces. Since the object takes the place of a plurality of tokens, it is hereafter called a multi-token.
